Discuss Filming Techniques with Your Students

- minimize movement and shaking
- practice zooming in and out
- practice eye contact with camera
- Learn or memorize part; avoid “reading” (it’s boring!)
More Filming Tips...

- *re-film* mistakes instead of editing out
- film *away* from other students to avoid background noise
- Edit *music and sound effects* carefully (sound works BEST for segments in which people are *not talking*, and/or during transitions)
Making the Movie

• preview “Flip clips” before importing to iMovie
• preview “Event” clips before dragging to “Project”
• preview finished movie before exporting to desktop
