RE: WesPac Project Status, Review of Recirculated Draft EIR Comments

Dear Mr. Diefenbach:

The public comment period for the Recirculated Draft Environmental Impact Report (RDEIR) closed on September 13, 2013. Based upon the comments received to date, City staff anticipates the addition of information to one or more sections of the RDEIR. In light of this, and in order to afford the public additional opportunity for review and comment, the City plans to open a new public review and comment period for the applicable portions of the RDEIR.

The City, as the lead agency for CEQA compliance on the WesPac project, is committed to protecting the community and in prioritizing safety. Therefore, ensuring a complete and comprehensive environmental review for the proposed project is of utmost importance. Accordingly, City staff will want to meet with you to discuss the appropriate next steps. Kristi Pollot, the City's lead planner on this project, will contact you this week to discuss further.

Sincerely,

Joe Sbranti
City Manager
